SPEAKER OF THE MONTH

LATEST FROM ANDY VIA PACKET :

```

*****
*   Dave Meechan W6EMD will teach us all how to   *
*   make a                                           *
*   " A SIMPLE 80 METER BROAD BAND ANTENNA "      *
*   Dinner at the Su Hong as usual; we start to   *
*   gather at the bar around 6PM. Meeting: 7:30   *
*****

```

Dave is a EE of varied background, and has altered a design that appeared recently in QST which involved tripple tuning, making a much smaller 80M antenna that has double tuning and fits well with an average tower to provide good operation all over the wide 80M band.

Recently, during that San Carlos city council flap over "those ugly T-shaped antennas", I remember watching Dave impressively convince the politicians that hams need big and tall antennas, so we're going to hear from an expert!
